August 10, 1990

The Honorable William K. Reilly
Administrator
Environmental Protection Agency
401 M Street SW
Washington, DC 20460

Dear Administrator Reilly,

It is my understanding that the United States Environmental Protection Agency is presently considering the use of a performance additive referred to as Hi-Tec 3000 in this country. It is further my understanding that the use of this additive may reduce tailpipe emissions and automobile-related pollutions.

As a member of the Energy, Environment & Natural Resources Committee in the Illinois House of Representatives, I am aware that air quality is a critical issue in Illinois and will continue to remain a critical issue for years to come. We must make every effort to improve the quality of air throughout Illinois and particularly in our urban areas.

With this in mind, I urge you and the Environmental Protection Agency to give the use of this additive in the United States your full consideration. We must undertake all efforts possible to improve air quality in our country.

Sincerely,

A handwritten signature in cursive script, reading "Leroy Van Duyne".

LEROY VAN DUYNE
